Build a focused purchasing brief.

Use collection references to connect your cup, artwork and packaging requirements.

01 • Select the cup

Choose the cup reference, size and preferred lid. Collection images may show multiple colors or sizes; select one version for your order.

02 • Define the decoration

Send a PDF logo preview, desired artwork dimensions, position and color reference. Ask which method suits the proposed cup and finish.

03 • Coordinate the color box

Describe the retail or gift presentation, protective insert and required product information. Review the dieline before final print artwork.

04 • Confirm the sample and order

Request the model-specific specification, sample plan, MOQ, pricing, production timing, applicable documents and shipping terms.

How to use this catalog

Each collection reference links to its live product page. Images are examples; names and illustrated capacities are selection references. Final materials, functional details, colors and packing are confirmed with the quotation and approved sample. No catalog entry establishes a test-report scope, stock level, price or delivery promise.

Match the method to the artwork.

Discuss suitability for the selected cup, surface and finish; approve the decorated sample.

Laser engraving

Text and line logos with surface-dependent contrast. Approve logo size, fine details, position and appearance.

Screen printing

Defined spot-color artwork. Confirm color count, registration, ink adhesion and the printable area.

UV digital printing

Detailed multicolor artwork on a compatible body. Review print dimensions, white underbase, color and adhesion.

Water-slide decals

Positioned decorative graphics. Review edges, bubbles, alignment, seams and the finishing route.

Hydrographic water transfer

Pattern-led surfaces. Review stretching, seam position and pattern scale; a precise logo may need a separate step.

Paint-transfer patterns

Decorative transfer concepts. Confirm the proposed process, repeat alignment, coverage and finish.

Sublimation

Heat transfer onto a compatible polymer-coated surface. Ordinary paint or bare metal is not automatically suitable.

Care and durability

Agree appropriate adhesion, abrasion and washing checks for the complete cup and decoration system. A process name does not establish dishwasher suitability.

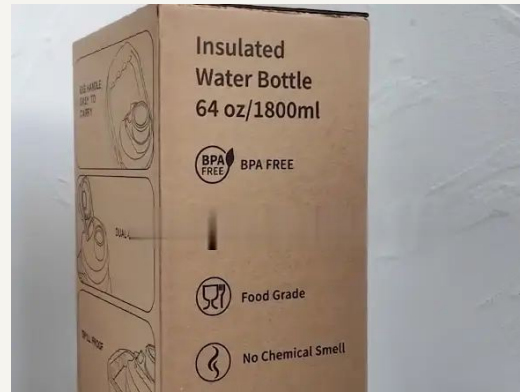

Compare the process videos and photo guide at fogoose.com/customization/

Complete the presentation.

Review structure, print, protection and labeling around the approved cup.

Printed color box

Printed kraft box

Window presentation

Foil-accent gift box

The packaging brief

Box structure and dimensions; handle and lid clearance; paperboard and insert; CMYK or specified-color artwork; finishes; barcode, care and product information; master carton and shipping marks.

Approval sequence: dieline → artwork proof → fitted sample → agreed packing checks.

Shown packaging is illustrative. Final print artwork, fit and packing specification are approved for your project.

Approve the details before production.

Use this checklist with your quotation, specification and approval sample.

Cup & configuration
